Karimnagar, Telangana

SUMMARY

Motivated B.Tech student in Electronics and Communication Engineering with foundational knowledge in cloud computing and exposure to cloud technologies. Looking for an entry-level opportunity to integrate technical and analytical skills while contributing to organizational growth

EDUCATION

B Tech - Electronics and Communication Engineering **SEP 2023 - Present**
SREE CHAITANYA COLLEGE OF ENGINEERING, KARIMNAGAR, TELANGANA

INTERMEDIATE

MAHATMA JYOTIBA PHULE, HYDERABAD, TELANGANA **2023**
Percentage: 70%

SSC

MAHATMA JYOTIBA PHULE, HYDERABAD, TELANGANA **2022**
GPA: 10

TECHNICAL SKILLS

- **Programming:** Python, Java (Basics)
- **Web Technologies:** HTML, CSS, Javascript
- **Database:** MySQL
- **Tools:** Git, VS Code
- **Operating Systems:** Windows, Linux (Basics)

PROJECTS & WORKSHOPS

1. Drunk and Drive Detection and Notification System

Developed an embedded safety system that detects driver intoxication using sensor data and prevents vehicle operation while sending real-time alerts to predefined contacts.

Key Features:

- Alcohol detection using MQ-series sensor integrated with microcontroller
- Automatic engine locking mechanism upon detection of unsafe alcohol levels
- Real-time alert system via GSM module to notify emergency contacts
- Buzzer and LED indicators for immediate local warning
- Low-cost and efficient design suitable for real-world vehicle integration

2. IoT-Based Smart Medicine Dispenser with Real-Time Monitoring

Designed an IoT-enabled smart medicine dispenser that automates medication scheduling and provides real-time monitoring through a connected platform

key Features:

- Automated pill dispensing based on pre-programmed schedules
- IoT integration (Wi-Fi module like ESP8266/ESP32) for remote monitoring
- Real-time alerts and notifications via mobile app/cloud platform
- LCD/display interface for user-friendly interaction
- Helps improve patient adherence and reduces missed doses

3. IPCB Design and Circuit Prototyping Workshop

Completed hands-on training in PCB design and circuit prototyping, gaining practical experience in designing, simulating, and fabricating electronic circuits.

key Features:

- Designed PCB layouts using tools like Eagle/KiCad/Proteus
- Circuit simulation and validation before hardware implementation
- Hands-on soldering and component placement techniques
- Understanding of schematic design, routing, and debugging
- Exposure to industry-standard electronics design workflow

CERTIFICATIONS

- AI/ ML/ PYTHON
- Data Analytics Job Simulation / DELOITTE
- Gen Ai Powered Data Analytics Job Simulation / TATA

INTERNSHIP & TRAINING

AI/ ML / PYTHON INTERN

SEP 2025 - NOV 2025

Branic Tech Solutions | 3 Months

- Worked on machine learning concepts, data preprocessing, and model evaluation
- Developed Python programs using NumPy, Pandas, and Matplotlib
- Built basic ML models for prediction and classification
- Performed data analysis and visualization on real-world datasets

ACHIEVEMENTS

- Shortlisted for **Gemini Student Ambassador Program**
- Participated in **Think X Hackathon**, contributing to innovative problem-solving
- Completed a **3-month AI/ML internship** with hands-on experience
